

# Yuvraj S. Chahal

ychahal2@illinois.edu | (703)-955-1098 | [yuvchal.github.io/portfolio](https://yuvchal.github.io/portfolio) | [linkedin.com/in/yuvraj-chahal](https://linkedin.com/in/yuvraj-chahal)

## EDUCATION

### University of Illinois at Urbana-Champaign (UIUC)

Champaign, Illinois

B.S. in Computer Science + Economics

Expected Graduation, May 2026

- **GPA:** 3.80/4.00, *Dean's List*
- **Related Coursework:** Data Structures & Algorithms, Applied Machine Learning, Algorithms & Models of Computation, Computer Systems, Database Systems, Discrete Math, Prob. & Statistics for CS, Linear Algebra

## EXPERIENCE

### Zolon Tech, Inc.

Reston, Virginia

Software Engineering Intern

June 2024 – Present

- Engineered and deployed python **AWS Lambda functions** using Amazon **Textract** for **optical character recognition (OCR)**, processing and storing JSON data in Amazon **S3**, improving document digitization efficiency by ~30%.
- Developed **REST APIs** to integrate OCR Lambda functions with **ServiceNow**, streamlining document processing workflows for the Administration for Children and Families.

### Sunrise Valley Dental

Reston, Virginia

Office Assistant/Intern

May 2023 – Aug 2023

- Used experience in web development to create a form on the company's website allowing patients to request appointments online instead of only over the phone. Increased productivity of existing staff by 20%.
- Boosted soft skills by assisting patients with check in/out, taking phone calls, and making appointments.

### University of Illinois at Urbana-Champaign (UIUC)

Champaign, Illinois

Computer Science Course Assistant

Jan 2023 – Dec 2023

- Hosted one-on-one office hours helping students debug/test their code, as well as explain complex conceptual topics.
- Assisted 100+ students overcome technical challenges regarding homework, projects, quizzes, etc.

## PROJECTS

### Neural Network from Scratch

- Designed a **neural network** from scratch using **PyTorch** to play Pac-Man
- Developed a **deep convolutional Q-learning agent** with multiple **convolutional layers**, **batch normalization**, and **fully connected layers**, leveraging experience replay and target networks for stable and efficient learning.
- Fine-tuned hyperparameters such as learning rate, discount factor, and epsilon decay, employing **Adam optimizer** and **mean squared error loss** for optimal Q-value estimation.

### HackIllinois 2024 Hardware Hack

- Engineered a robot using Raspberry Pi winning **2nd place** at HackIllinois, the **largest hackathon in the Midwest**.
- Designed and implemented **autonomous navigation** logic in Python, incorporating **state machine principles** for dynamic behavior adjustment in real-world conditions.
- Utilized **OpenCV** for **real-time image processing**, enabling the robot to follow paths and detect/avoid obstacles using **color filtering and contour detection** techniques.

### TwitterNLP

- Developed a Python-based **sentiment analysis tool** to scrape tweets from certain users, search terms, or hashtags.
- Utilized the advanced RoBERTa model, an evolution of Google's BERT, for **natural language processing**, accurately categorizing tweets into positive, neutral, and negative sentiments.
- Implemented **data visualization** using **Plotly**, showcasing sentiment trends over time and enabling detailed analysis through user-interactive features.

### Illini Rideshare

- Created a web application using **React.js**, **Node.js**, and **HTML/CSS/JS** for university ridesharing.
- Integrated **Microsoft's Authentication Library** for secure access, restricting sign-in to University of Illinois students.

## SKILLS

**Programming:** Java, Python, JavaScript, HTML/CSS, SQL, Node.js, React.js, C++, C, R

**Tools:** Git, Scikit-learn (sklearn), PyTorch, OpenCV, Pandas, NumPy, Matplotlib, AWS, Docker, Linux, Flask, Android Studio, Eclipse, Jupyter
